Download and install the latest DisplayLink drivers at www.elotouch.com/support.

Note: DisplayLink driver installation requires another display to be functioning during driver installation because the 0702L will not function without the drivers installed.

Monitor can be mounted to any standard 75mm x 75mm VESA mounting bracket using four M4x8mm screws.

2

Connect the micro USB cable. Ensure the rubber gasket (red) is all the way inside the cable cover area.

5

Connect the Data Connector of the Y-Cable to the host PC USB port. Note: Some computers also require connecting the AUX Power connector to the host PC.

3

Install the cable cover by installing the top side first and rotating it down. Secure the door with the M3 screw included.
